Regulator Yoke Washer with Rubber Ring

HCPCS:

• The Regulator Yoke Washer with Rubber Ring is for use with oxygen regulators.
• It is fit between the regulator and the oxygen tank to create a seal with the oxygen tank.
• Constructed of brass and viton for durability and optimal performance
• Makes airtight cylinder-yoke connection easy to achieve with little force
• Never install a regulator with more than one regulator yoke washer at once
• Should be replaced every 6 months or in the event of a leak
• Quantity: 25/pack
• To ensure an airtight connection between your regulator and oxygen tank, purchase your Regulator Yoke Washer with Rubber Ring and replace often.
