Salter In Line Water Trap with Screw Ends

HCPCS:

• The Salter In-Line Water Trap collects water and moisture that may form during oxygen therapy.
• It traps the condensation from the system, preventing water from entering the patient's nose.
• For use with in-line concentrators
• Simple, durable design that minimizes hazard of snagging on furniture
• Screw-on end caps
• Clear for visual inspection of water build-up
• Quantity: 25/case
• To give patients the benefit of humidification therapy without condensation entering their nose, purchase the Salter In-Line Water Trap.
