• The Bench That Moves: An innovative easy-glide roller system delivers smooth, controlled transfers without the sticking or excessive force common with traditional sliding benches.
• 360° Rotating Seat: A lever-lock rotating seat securely locks into four positions, allowing users to enter and exit the tub from their most comfortable angle.
• Smooth, Sag-Free Performance: Independent rollers paired with a reinforced support beam provide stable, confident movement throughout every transfer.
• Safer on Wet Surfaces: Angled anti-slip feet with water-dispersing treads improve traction on wet floors, while integrated drainage channels help reduce standing water on the seat.
• Broad Customer Fit: Fourteen height adjustment settings, a spacious 20" × 14" seat, removable armrests, and a 350 lb weight capacity allow one SKU to accommodate a wide variety of users.
• Premium Design and Colors: Modern styling, durable construction, and retail-ready packaging provide a differentiated solution that stands apart from traditional transfer benches coming in Pearl and Storm colors.
