

Garmetrode Conductive Sock - Universal Fit

HCPCS:

- The Garmetrode Conductive Sock is an alternative to traditional adhesive-backed electrodes, providing 360 degrees of even electrode treatment over the foot and ankle for the utmost effectiveness in treating injuries and disorders.
- It is compatible with all standard TENS lead wires pins and its stretchable fabric allows for a comfortable, universally snug fit.
- Effective and convenient, providing even stimulation to the entire foot and ankle
- Universal size with stretchable fabric
- To be used in conjunction with a TENS device; compatible with standard TENS lead wires pins (0.080 in. diameter)
- Reusable and hand washable
- Should be moistened with water (DO NOT soak) or used in conjunction with Conductive Spray (#LS2177 sold separately) for increased conductivity and to prevent tarnish to garment that water and other media may cause
- Includes: Four (4) EF3000TC2, 3" round electrodes and one (1) WS3147 pig tail snap
- To best treat foot and ankle injuries with electrotherapy, purchase the Garmetrode Conductive Sock.
