Knee/Shoulder Moist Heat Pack

HCPCS:

• Therapeutic moist heat therapy provides deeper penetration to muscle tissue, allowing temporary relief of pain due to sprains, muscle strains, back pain, bursitis, arthritis and more.
• Moist heat has also been established to increase tissue temperature at a faster rate than dry heat, causing increased circulation and promoting quicker recovery time.
• With a full range of sizes and covers available, TheraMED Professional hot packs work with most heating units on the market today and will address all your clinic needs.
• Clay-filled packs provide up to 30 minutes of therapeutic relief
• Red and white tabs visually assist for easy rotation
• Seven sizes available to provide therapy to nearly any body part
• Terry covers available in a variety of sizes (see reverse for details)
• Great for clinical or at-home use
• One Year Warranty
