Quattro 2.5 Professional Electrotherapy Device

HCPCS:

• The microprocessor controlled Quattro 2.5 is a professional four-channel electrotherapy device that provides IFC and Premodulated, Russian, EMS and TENS waveforms with two separate timers.
• Choose between several different amplitude modulation options.
• The interferential and pre-modulated modes offer frequency modulation as well as a static frequency option.
• The portable design lets you take it to your patient or keep it at the clinic.
• 4-channel electrotherapy with separate timers for simultaneous treatment for two treatment areas or two patients at once
• Large easy-to-read graphical LCD display with exact dial performance and two programmable timers
• Preset protocols as well as customized user defined protocols
• Waveforms include TENS, EMS, Premod (IF-2P), IFC (IF-4P) and Russian
• Constant current and constant voltage modes
• 10-presets per waveform totaling 50-presets in all (plus professional mode)
• Designed for tabletop, therapy cart or mobile use
