STRENGTHBRACE Universal Hinged Knee Brace

HCPCS:

• The STRENGTHBRACE Universal Hinged Knee Brace provides stability and support for chronic knee pain and instability.
• A unique wrap-around design fits a wide range of patient sizes.
• The lightweight, breathable neoprene material provides optimal compression while keeping patients comfortable and compliant.
• Medial and lateral stays provide excellent support and promote proper alignment while the hidden hinges can be set to provide the desired level of flexion/extension range of motion.
• Fits 12"- 23": measure around center of the knee with leg extended
• Enclosed tubular donut buttress
• Polycentric hinge provides flexion/extension and can be easily set for desired range of motion
• Hinge breaks at 0°, 10°, 20°, 40°, 60° and 90°
• Shortened knee brace design decreases the material bulk for increased comfort especially when worn for prolonged periods of time
• Can be worn on left or right knee PDAC assigned code: L1832 and L1833
• 1 year warranty
