FIGURE C

- Lightweight and low-impact, the HurryCycle® pedal exerciser is the perfect solution for those who want to remain active while at home.
- The pedaler exerciser is designed to stand on its own and can be moved with the pole handle to prevent falls caused by bending over to adjust or move the device. Rotate the handle to adjust the tension for any fitness level, and the electronic display keeps track of progression. For added comfort and safety, the pedal exerciser also features a foam grip, non-slip rubber pads, and self-righting feet for a comfortable and safe experience.
- Stands on its own and can be moved with pole handle
- Tension knob built into the handle adjusts to any fitness level
- Electronic display shows workout stats like Time, Count, Calories, and Reps Per Minute
- Patented self-righting foot allows for easy transitions while using
- Foam grip and non-slip rubber pads provide added comfort and safety
- Lightweight and compact for everyday storage and transportation
- Tool free assembly
