WalkWise by Drive Smart Activity Monitor

HCPCS:

• Peace of Mind: Feel confident staying connected with a monitoring system, even if you live far away or are unable to check in on your loved one frequently.
• 24/7 Monitoring: This smart walker accessory makes it easy to understand if users are staying active and consistently using their walker or rollator. Consistent use of prescribed mobility devices can help reduce the risk of falls.
• Real-Time Notifications: Stay aware of trends in activity that may signal a problem with easy-to-understand data sent from the smart walker/rollator accessory to your phone or device with required monthly subscription. Subscription is $14.99 per month, or $11.99 per month if you pay annually. Provides pop-ups if mobility aids are tipped over or inactive for long periods of time.
• Unobtrusive & Easy to Use: No intrusive cameras, wearables, or charging! These monitoring devices work automatically in the background, and users don't need a smartphone.
• Activity Tracking: Designed specifically for walker and rollator users, these easy-to-attach accessories track distance and daily activities where traditional fitness trackers can't.
