Meridian Alternating Pressure Pad with Electric Pump

HCPCS:

• The Meridian SatinAir Adjustable Alternating Pressure Pump and Pad System is designed to be placed over an existing mattress and is both easy to use and maintain.
• The compact, quiet pump alternately inflates and deflates air cells in the pressure pad and comes standard with a variable pressure setting for maximum patient comfort and compliance.
• The pump features an output of five liters per minute with a five minute cycle time, and can be mounted on the bed with built-in brackets.
• FEATURES:
• 5 liter-per-minute pump alternately inflates and deflates air cells over a 5 minute cycle time
• Variable pressure setting for added patient comfort
• Pump can be mounted on the bed with built-in bracket
• Pad includes flaps that wrap around mattress for better stability
• Does not contain latex
• Support patients up to 300 lbs.
• One-year limited warranty on pump, 90-days limited warranty on pad
