AquaSense Toilet Safety Rails

HCPCS:

FIGURE A

FIGURE B

Provides added stability for getting safely on and off your toilet! These new safety rails secure to both standard and elongated toilets using the existing bolts. Whats more, installation is simple and the arms offer sturdy support that doesnt get in the way, compared to models that have a bar across the bowl.

- The durable steel frame supports up to 300 lbs
- Padded armrests provide superior support and create a comfortable, non-slip surface for a safe and secure grip
- Simply and quickly adjust the width for proper fit and comfort. Width adjustments on this model range from 15.5" to 18"
