SATINAIR APM-5/3 W/ANALOG PUMP

HCPCS:

• The Meridian SatinAir Foam (5"air/3"foam) APM system is a complete therapy mattress system.
• Designed to provide alternating pressure and low air loss, the SatinAir Foam optimizes pressure redistribution and helps to manage skin maceration.
• This system is the perfect option where a base foam layer is critical to prevent patients bottoming out during power outages.
• The powerful 9 liter-per-minute pump offers static inflation for transfers or patient care and convenient settings by patient weight.
• The nylon zipper cover is low shear, fluid-resistant and vapor permeable.
• The emergency CPR valve allows for quick deflation if necessary.
• The Meridian SatinAir Foam offers innovative design for use in nursing homes, hospitals and the home care environment.
