Memory Foam Cervical Sleep Pillow

HCPCS:

• Our Memory Foam Cervical Sleep Pillow gently supports the head and neck during sleep to help remedy many common ailments, including tension headaches, neck spasms, arthritis, whiplash, post-spinal surgery and snoring.
• This higher-density memory foam softens in reaction to body head, allowing the pillow to mold around the head and neck quickly offering comfort and support.
• Its unique recessed core provides proper cervical support when sleeping on your back or side which improves posture and encourages rejuvenation of the body to provide a better night sleep.
• Fits a standard pillowcase.
• Designed with a recessed core to support the head, neck and shoulders
• Minimizes tossing and turning for a deeper more restorative nightÃç??s sleep
• Provides gentle neck support in every position
• Visco-elastic memory foam softens in reaction to body heat and returns to original shape when pressure and head are removed.
• Soft terry cloth cover
• Fits a standard pillowcase
